

# PARCO Press Guards

Our press guarding is designed with spring-lifts for vertical door applications that are furnished on machines where guards need to be quickly and easily positioned up and out of the way for die setup and maintenance. These lift-type guards are designed for each application to meet the requirements of OSHA regulations and ANSI standards.

Our press guards are aesthetically pleasing, provide safety for employees, meet OSHA requirements and are easily installed in minutes. Like all Parco products, we will work with you to custom design a solution at no extra cost and with no extra lead time!

o Bifold Door System
o Sliding Door System
o Hinged Door System

### Assembly

o Kit
o Pre-assembled
o Installed

**Part No. FKT-753**  
Hairpin Clip Assembly

## Hairpins

Hairpins provide adjustability of the guard for going around conveyors, chutes, or other obstructions on the machine or robot.

Mechanical Motor Spring helps counterbalance the spring-lift guard.

Model #	Lift Capacity
FKT-673	20 lbs.
FKT-674	30 lbs.
FKT-675	40 lbs.
FKT-676	50 lbs.

\* with 60" cable standard.
